

# Ursula von der Leyens state of the union-tale

**Taler**

Ursula von der Leyen  
Formand for  
Europakommissionen

**Dato**

13. september 2023

**Sted**

Strasbourg

**Omstændigheder**

Rubrik og underrubrikker (versaleret tekst) ikke med i talen. Redaktionen arbejder på en oversættelse.

1 Honourable Members,

In just under 300 days, Europeans will take to the polls in our unique and remarkable democracy.

5

As with any election, it will be a time for people to reflect on the State of our Union and the work done by those that represent them.

10 **But it will also be a time to decide on what kind of future and what kind of Europe they want.**

Among them will be millions of first-time voters, the youngest of whom were born in 2008.

15 As they stand in that polling booth, they will think about what matters to them.

They will think about the war that rages at our borders.

Or the impact of destructive climate change.

20

About how artificial intelligence will influence their lives.

Or of their chances of getting a house or a job in the years ahead.

25

**Our Union today** reflects the vision of those who dreamt of a better future after **World War II**.

30

A future in which a Union of nations, democracies and people would work together to share peace and prosperity.

**They believed that Europe was the answer to the call of history.**

35

When I speak to the new generation of young people, I see that same vision for a better future.

That same burning desire to build something better.

40

That same belief that in a world of uncertainty, **Europe once again must answer the call of history.**

45 And that is what we must do **together.**

Honourable Members,

50

This starts with **earning the trust** of Europeans to deal with their aspirations and anxieties.

And in the **next 300 days** we must **finish the job** that they entrusted us with.

55

I want to thank this House for its leading role in delivering on one of the most ambitious transformations this Union has ever embarked on.

When I stood in front of you in 2019 with my programme for a **green, digital and geopolitical Europe** I know that **some had doubts.**

60

And that was **before** the world turned upside down with a global pandemic and a brutal war on European soil.

But look at where Europe is today.

65

We have seen the birth of a **geopolitical Union** – supporting Ukraine, standing up to Russia's aggression, responding to an assertive China and

investing in partnerships.

70 We now have a **European Green Deal** as the **centrepiece** of our economy and **unmatched** in ambition.

We have set the path for the **digital transition** and become **global pioneers in online rights**.

75

We have the historic **NextGenerationEU** – combining 800 billion euros of **investment and reform** – and **creating decent jobs** for today and tomorrow.

80 We have set the **building blocks** for a **Health Union**, helping to vaccinate an entire continent – and large parts of the world.

We have started making ourselves **more independent** in critical sectors, like energy, chips or raw materials.

85

I would also like to thank you for the **ground-breaking and pioneering work** we did on **gender equality**.

As a woman, this means a lot to me.

90

We have concluded files that many thought would be blocked forever, like the **Women on Boards Directive** and the **historic accession of the EU to the Istanbul Convention**.

95 With the **Directive on pay transparency** we have cast into law the basic principle that equal work deserves equal pay.

100 **There is not a single argument why** – for the same type of work – a woman should be paid less than a man.

But our work is far from over and we must continue pushing for progress together.

105 I know this house supports our proposal on **combating violence against**

**women.**

Here too, I would like that we cast into law another basic principle: **No, means no.**

**There can be no true equality without freedom from violence.**

And thanks to this Parliament, to Member States and to my team of Commissioners, we have **delivered over 90% of the Political Guidelines** I presented in 2019.

Together, we have shown that **when Europe is bold, it gets things done.**

And our work is far from over - **so let's stand together.**

**Let's deliver today and prepare for tomorrow.**

## **EUROPEAN GREEN DEAL**

Honourable Members,

Four years ago, the European Green Deal was our **answer to the call of history.**

And this summer – the hottest ever on record in Europe – was a stark reminder of that.

**Greece and Spain** were struck by ravaging wildfires – and were hit again only a few weeks later by devastating floods.

And we saw the **chaos and carnage** of extreme weather – from Slovenia to Bulgaria and right across our Union.

**This is the reality of a boiling planet.**

The European Green Deal was born out of this necessity to protect our planet.

150 But it was also designed as an opportunity to preserve our future prosperity.

We started this mandate by setting a long-term perspective with the climate law and the 2050 target.

155 We shifted the climate agenda to being an **economic** one.

This has given a **clear sense of direction for investment and innovation.**

And we have already seen this **growth strategy delivering** in the short-term.

160

Europe's industry is showing every day that it is ready to power this transition.

Proving that **modernisation and decarbonisation** can go hand in hand.

165 In the last five years, the number of **clean steel factories** in the EU has grown from zero to 38.

We are now attracting **more investment in clean hydrogen** than the US and China **combined.**

170

And tomorrow I will be in Denmark with Prime Minister Mette Frederiksen to see that innovation first hand.

175 We will mark the launch of the first container ship, powered by clean methanol made with solar energy.

**This is the strength of Europe's response to climate change.**

180 The European Green Deal provides the necessary frame, incentives, and investment – but it is the people, the inventors, the engineers who develop the solutions

And this is why, Honourable Members, as we enter the **next phase** of the

185 European Green Deal, one thing will never change.

**We will keep supporting European industry throughout this transition.**

We started with a package of measures – **from the Net-Zero Industry Act to**  
190 **the Critical Raw Materials Act.**

With our **Industry Strategy**, we are looking at the risks and needs of each  
ecosystem in this transition.

195

We need to finish this work.

And with this, we need to develop an approach for each industrial ecosystem.

200 Therefore, starting from this month, we will hold **a series of Clean**  
**Transition Dialogues** with industry.

The **core aim** will be to support every sector in building its business model for  
the decarbonisation of industry.

205

Because we believe that this transition is essential for our future competitiveness  
in Europe.

210 **But** this is just as much about the **people and their jobs of today.**

Our **wind industry**, for instance, is a European success story.

215 But it is currently **facing a unique mix of challenges.**

This is why we will put forward a **European Wind Power package** – working  
closely with industry and Member States.

220

We will fast-track permitting even more.

We will improve the auction systems across the EU.

225

We will focus on skills, access to finance and stable supply chains.

But this is **broader** than one sector:

230 From wind to steel, from batteries to electric vehicles, our ambition is crystal clear: **The future of our clean tech industry has to be made in Europe.**

**Honourable Members,**

235

**This shows that when it comes to the European Green Deal:**

**We stay the course.**

240

**We stay ambitious.**

**We stick to our growth strategy.**

**And we will always strive for a fair and just transition!**

245

That means a fair outcome for future generations – to live on a healthy planet.

And a fair journey for all those impacted – with **decent jobs and a solemn promise to leave no one behind.**

250

Just think about **manufacturing jobs and competitiveness:** a topic we are discussing a lot these days.

255

Our industry and tech companies **like** competition.

They **know** that global competition is **good** for business.

And that it **creates** and **protects** good jobs here in Europe.

260

But competition is **only true** as long as it is **fair.**

265 Too often, our companies are excluded from foreign markets or are victims of predatory practices.

They are often **undercut by competitors** benefitting from huge state subsidies.

270

We **have not forgotten** how China's **unfair trade practices** affected our **solar industry**.

275

280 Many young businesses were pushed out by heavily subsidised Chinese competitors.

285

Pioneering companies had to file for bankruptcy.

290

295 Promising talents went searching for fortune abroad.

300

This is why **fairness** in the global economy is so important – because it affects lives and livelihoods.

305

310

Entire industries and communities depend on it.

315

So, we have to be clear-eyed about the risks we face.

320

325 **Take the electric vehicles sector.**

330

It is a crucial industry for the clean economy, with a huge potential for Europe.

335

But global markets are now **flooded** with cheaper Chinese electric cars.

345

And their price is kept **artificially** low by huge state subsidies.

350

**This is distorting our market.**

355

360

**And as we do not accept this from the inside, we do not accept this from the outside.**

365

370

So I can announce today that the Commission is launching an **anti-subsidy investigation into electric vehicles coming from China.**

375

**Europe is open for competition. Not for a race to the bottom.**

380

385

390

We must defend ourselves against unfair practices.

395

400

But equally, it is vital to keep **open lines of communication and dialogue with China.**

405

Because there **also are** topics, where we can and have to cooperate.

410

415

**De-risk, not decouple** – this will be **my approach with the Chinese leadership at the EU-China Summit later this year.**

420

425

430 Meine Damen und Herren Abgeordnete,

435

In der Europäischen Union sind wir stolz auf unsere **kulturelle Vielfalt**.

440

Wir sind das „Europa der Regionen“ mit einer ganz besonderen Vielfalt an  
445 Sprachen, Musik, Kunst, Traditionen, Handwerken und kulinarischen  
Köstlichkeiten.

450

Wir sind auch das **Europa einer einzigartigen biologischen Vielfalt**.

455

460

Etwa 6500 Arten kommen **nur** in Europa vor.

465

Im Norden Europas liegt das **Weltnaturerbe Wattenmeer**, ein einzigartiger Lebensraum, der seltenen Tier- und Pflanzenarten eine Heimat bietet und für  
470 Millionen von Zugvögeln überlebenswichtig ist.

475

Und mit der **Ostsee haben wir das größte Brackwassermeer der Welt.**

480

Nach Süden schließen sich **europäische Tiefebene**n an, die von **großen**  
485 **Mooren und Feuchtgebieten** geprägt waren und sind.

490

Diese Regionen sind **wichtige Verbündete gegen das Fortschreiten des Klimawandels.**

495

500

Geschützte Moore und Feuchtgebiete binden große Mengen an **Treibhausgasen**, sichern **regionale Wasserkreisläufe** und beheimaten eine einzigartige Biodiversität.

505

510 Und Europa ist **waldreich**.

515

Von **mächtigen Nadelwäldern im Norden und Osten** über die **letzten Urwälder von Eichen und Buchen** in Mitteleuropa bis hin zu den **Korkeichenwäldern Südeuropas** liefern alle diese Wälder für uns nicht zu ersetzende Güter und Leistungen.

520

525

Sie binden Kohlenstoff, liefern Holz und andere Produkte, erzeugen fruchtbare Böden, filtern Luft und Wasser.

530

Biodiversität und Ökosystemleistungen sind für alle Menschen in Europa  
**überlebenswichtig.**

540

Der Verlust dieser Natur **zerstört nicht nur die Lebensgrundlage**, sondern  
545 auch das **Heimatgefühl von Menschen.**

550

**Wir müssen sie schützen.**

555

Und gleichzeitig muss auch die **Sicherung unserer Lebensmittelversorgung**  
560 **mit und in der Natur Aufgabe sein und bleiben.**

565

**Ich möchte heute unseren Landwirten meine Anerkennung aussprechen**  
und ihnen dafür danken, dass sie uns Tag für Tag mit Lebensmitteln versorgen.

570

575

Gesunde Lebensmittel – für uns in Europa ist diese Aufgabe der Landwirtschaft die Grundlage unserer Agrarpolitik.

580

Und auch die Unabhängigkeit in der Lebensmittelversorgung ist uns wichtig.

585

590

Das leisten unsere Landwirte.

595

600

Das ist nicht selbstverständlich, denn die Folgen der russischen Aggression gegen die Ukraine, der Klimawandel mit Dürren, Waldbränden und Überflutungen, aber auch neue Verpflichtungen prägen zunehmend die Arbeit der Landwirte und ihre Einkommenssituation.

605

**Wir müssen dem Rechnung tragen.**

610

615

Viele setzen sich schon heute für eine nachhaltigere Landwirtschaft ein.

620

Wir müssen zusammen mit den Männern und Frauen in der Landwirtschaft, diese neuen Herausforderungen bewältigen.

625

630

Nur so können wir unsere Lebensmittelsicherheit auch für die Zukunft absichern.

635

**Wir brauchen mehr Dialog und weniger Polarisierung.**

640

645

Aus diesem Grund möchten wir einen **strategischen Dialog zur Zukunft der Landwirtschaft in der EU** starten.

650

655 Ich bin und bleibe davon überzeugt, dass **Landwirtschaft und Naturschutz**  
zusammen gehen können.

660

**Wir brauchen beide.**

665

670

675

**ECONOMY, SOCIAL AND COMPETITIVENESS**

680

Honourable Members,

685

690

A fair transition for farmers, families and industry.

695

This is the hallmark of this Mandate.

700

705

And it is all the more important as we face strong economic headwinds.

710

I see three major economic challenges for our industry in the year ahead: labour and skills shortages, inflation, and making business easier for our companies.

715

720

**The first has to do with our labour market.**

725

We have **not** forgotten the early days of the global pandemic.

735

When everyone predicted a **new wave of 1930-style mass unemployment.**

740

But we defied this prediction.

745

750 With SURE – the first-ever European short-time work initiative – we saved 40  
million jobs.

755

**This is Europe's social market economy in action.**

760

765 **And we can be proud of it!**

770

We then immediately restarted our economic engine thanks to NextGenerationEU.

775

780

And today we see the results.

785

Europe is close to full employment.

790

795 **Instead of millions of people looking for jobs, millions of jobs are looking for people.**

800

Labour and skills shortages are reaching record levels – both here and across all major economies.

805

810

**74% of SMEs** are saying they are facing skill shortages.

815

In the peak of the tourist season, restaurants and bars in Europe are running  
820 reduced hours because they cannot find staff.

825

Hospitals are postponing treatment because of lack of nurses.

830

And two thirds of European companies that are looking for IT specialists  
835 cannot find them.

840

At the same time **millions of parents** – mostly mothers – are struggling to  
reconcile work and family, **because there is no childcare.**

845

850

And 8 million young people are neither in employment, education or training.

855

Their dreams put on hold, their lives on stand-by.

860

865 **This is not only the cause of so much personal distress.**

870

**It is also one of the most significant bottlenecks for our competitiveness.**

875

880 Because labour shortages hamper the capacity for innovation, growth and prosperity.

885

So we need to improve access to the labour market.

890

895 Most importantly for **young people, for women.**

900

And we need **qualified migration.**

905

In addition, we need to respond to the **deep-rooted shifts in technology,**  
910 **society and demography.**

915

And for that, we should rely on the expertise of **businesses and trade unions,**  
**our collective bargaining partners.**

920

**It is almost forty years since Jacques Delors convened the Val Duchesse meeting that saw the birth of European social dialogue.**

930

935 Since then, social partners have shaped the Union of today – ensuring progress and prosperity for millions.

940

And as the world around us changes faster than ever, social partners must again be at the heart of our future.

945

950 Together we must focus on the challenges facing the labour market – from skills and labour shortages, to new challenges stemming from AI.

955

This is why together with **the Belgian Presidency** next year, we will convene a **new Social Partner Summit once again at Val Duchesse.**

960

965

The future of Europe will be built **with and by our social partners.**

970

975

980

**The second major economic challenge: persistent high inflation.**

985

Christine Lagarde and the European Central Bank are working hard to keep inflation under control.

990

995

We know that returning to the ECB's medium-term target will take some time.

1000

The good news is that Europe has started bringing energy prices down.

1005

1010

We have not forgotten, **Putin's deliberate use of gas as a weapon** and how it triggered fears of blackout and an energy crisis like in the 70s.

1015

Many thought, we would not have enough energy to get through the winter.

1020

1025

But we made it.

1030

Because we stayed united – pooling our demand and buying energy together.

1035

1040

And at the same time, different to the 70s, we used the crisis to massively invest in renewables and fast-track the clean transition.

1045

We used Europe's critical mass to bring prices down and secure our supply.

1050

1055

The price for gas in Europe was over 300 euros per MWh one year ago. It is now around 35.

1060

1065

So we need to look at how we can **replicate this model of success** in other fields like **critical raw materials or clean hydrogen**.

1070

1075

1080

**The third challenge for European companies is about making it easier to do business.**

1085

Small companies do not have the capacity to cope with complex administration.

1090

1095 Or they are held back by lengthy processes.

1100

This often means they do less with the time they have – and that they miss out on opportunities to grow.

1105

1110 This is why – before the end of the year – we will appoint an **EU SME envoy** reporting directly to me.

1115

We want to hear directly **from small and medium sized businesses**, about their everyday challenges.

1125

For every new piece of legislation we conduct a **competitiveness check** by an **independent board**.

1130

1135 And next month, we will make the first **legislative proposals towards reducing reporting obligations** at the European level by 25%.

1140

1145

1150 Honourable Members,

1155

Let's be frank – this will not be easy.

1160

1165 And we will need your support.

1170

Because this is a **common endeavour for all European institutions.**

1175

1180 So we also have to work with Member States, to match the 25% at **national level.**

1185

**It is time to make business easier in Europe!**

1190

1195

1200

But European companies also need **access to key technologies** to innovate, develop and manufacture.

1205

1210 This is a question of **European sovereignty** as the Leaders underlined in Versailles.

1215

It is an **economic and national security imperative** to preserve a European edge on critical and emerging technologies.

1220

1225

This European industrial policy also requires **common European funding**.

1230

This is why – as part of our proposal for a review of our budget – we proposed the STEP platform.

1235

1240

With STEP we can **boost, leverage and steer** EU funds to invest in everything from **microelectronics to quantum computing and AI.**

1245

1250 **From biotech to clean tech.**

1255

Our companies need this support now – so **I urge for a quick agreement on our budget proposal.**

1260

1265 And I know I can count on this House.

1270

And there is **more** when it comes to **competitiveness.**

1275

1280 We have seen real bottlenecks along **global supply chains**, including because  
of the **deliberate policies of other countries**.

1285

Just think about **China's export restrictions** on **gallium** and **germanium** –  
which are essential for goods like **semiconductors** and **solar panels**.

1290

1295

This shows why it is so important for Europe **to step up on economic  
security**.

1300

**By de-risking and not decoupling.**

1305

1310

And I am **very proud** that this concept has found **broad support from key  
partners**.

1320 From **Australia to Japan and the United States.**

1325

And many other countries around the world **want to work together.**

1330

**Many are overly dependent** on a **single supplier** for critical minerals.

1335

1340

Others – from Latin America to Africa – want to **develop local industries for processing and refining**, instead of **just shipping** their resources abroad.

1345

This is why later this year we will convene the **first meeting of our new**  
1350 **Critical Raw Materials Club.**

1355

At the same time, we will **continue to drive open and fair trade.**

1360

1365 So far, we have concluded new free trade agreements with **Chile, New Zealand and Kenya.**

1370

We should aim to complete deals with **Australia, Mexico and Mercosur by the end of this year.**

1375

1380

**And soon thereafter with India and Indonesia.**

1385

**Smart trade delivers good jobs and prosperity.**

1390

1395

1400

Honourable Members,

1405

1410 These three challenges – labour, inflation and business environment – come at a time when we are also asking industry to lead on the clean transition.

1415

So we need to look further ahead and set out **how** we remain competitive as we do that.

1420

1425

This is why I have asked Mario Draghi – one of Europe's great economic minds – to prepare a **report on the future of European competitiveness**.

1430

1435 Because Europe will do “whatever it takes” to keep its competitive edge.

1440

1445

## **DIGITAL & AI**

1450

1455

Honourable Members,

1460

When it comes to making business and life easier, we have seen how important digital technology is.

1465

1470

It is telling that we have far **overshot the 20% investment target** in digital projects of NextGenerationEU.

1475

1480 Member States have used that investment to digitise their healthcare, justice system or transport network.

1485

At the same time, Europe has led on **managing the risks of the digital world.**

1490

1495

The internet was born as an instrument for **sharing knowledge, opening minds and connecting people.**

1500

But it has also given **rise to serious challenges.**

1505

**Disinformation, spread of harmful content, risks to the privacy of our data.**

1515

1520 All of this led to a **lack of trust** and a **breach of fundamental rights of people.**

1525

In response, Europe has become the **global pioneer of citizen's rights** in the digital world.

1530

1535

The DSA and DMA are creating a **safer digital space** where fundamental rights are protected.

1540

And they are ensuring fairness with clear **responsibilities for big tech.**

1545

1550

**This is a historic achievement – and we should be proud of it.**

1555

The same should be true for **artificial intelligence**.

1560

1565

It will **improve healthcare, boost productivity, address climate change**.

1570

But we also should **not underestimate** the very real threats.

1575

1580 **Hundreds of leading AI developers, academics and experts** warned us recently with the following words:

1585

1590 “Mitigating the **risk of extinction** from AI should be a global priority alongside other societal-scale risks such as pandemics and nuclear war.”

1595

AI is a general technology that is **accessible, powerful and adaptable** for a vast range of uses - both civilian **and** military.

1600

1605 **And it is moving faster than even its developers anticipated.**

1610

So we have a narrowing window of opportunity to guide this technology responsibly.

1615

1620 I believe Europe, together with partners, should **lead the way on a new global framework** for AI, built on three pillars: **guardrails, governance and guiding innovation.**

1625

1630 Firstly, **guardrails**.

1635

Our **number one priority** is to ensure **AI develops in a human-centric, transparent and responsible way**.

1640

1645 This is why in my Political Guidelines, I committed to setting out a **legislative approach in the first 100 days**.

1650

We put forward the **AI Act** – the world's **first comprehensive pro-innovation AI law**.

1655

1660

**And I want to thank this House and the Council for the tireless work on this groundbreaking law.**

1665

1670 Our AI Act is already a **blueprint for the whole world.**

1675

We must now focus on adopting the rules as soon as possible and turn to implementation.

1680

1685

1690

The second pillar is **governance.**

1695

We are now laying the foundations for a single governance system in Europe.

1700

But we should also join forces with our partners to ensure a **global approach** to understanding the impact of AI in our societies.

1710

1715 Think about the invaluable contribution of the IPCC for climate, a global panel that provides the latest science to policymakers.

1720

I believe we need a similar body for AI – **on the risks and its benefits for humanity.**

1725

1730

With scientists, tech companies and independent experts all around the table.

1735

This will allow us to develop a fast and globally coordinated response – building on the **work done by the Hiroshima Process and others.**

1740

1745

The third pillar is **guiding innovation** in a responsible way.

1750

1755 Thanks to our investment in the last years, Europe has now become a **leader in supercomputing** – with 3 of the 5 most powerful supercomputers in the world.

1760

We need to capitalise on this.

1765

1770 This is why I can announce today a **new initiative to open up our high-performance computers to AI start-ups** to train their models.

1775

But this will only be **part** of our work to **guide innovation**.

1780

1785

We need an **open dialogue** with those that **develop and deploy AI**.

1790

It happens in the United States, where seven major tech companies have already agreed to **voluntary rules around safety, security and trust**.

1795

1800

It happens here, where we will work with AI companies, so that they voluntarily commit to the principles of the **AI Act before** it comes into force.

1805

1810

Now we should bring all of this work together towards **minimum global standards for safe and ethical use of AI**.

1815

1820

1825 **GLOBAL, MIGRATION AND SECURITY**

1830

Honourable Members,

1835

1840 When I stood here four years ago, I said that if we are united on the inside,  
nobody will divide us from the outside.

1845

And this was the thinking behind the Geopolitical Commission.

1850

1855 Our **Team Europe approach** has enabled us to be more strategic, more  
assertive and more united.

1860

And that is more important than ever.

1865

1870 Our heart bleeds when we see the devastating loss of life in **Libya and Morocco** after the violent floods and earthquake.

1875

Europe will always stand ready to support in any way we can.

1880

1885 Or think about the Sahel region, one of the poorest yet fastest growing demographically.

1890

The succession of military coups will make the region more unstable for years ahead.

1895

Russia is both influencing and benefiting from the chaos.

1905

And the region has become fertile ground for the rise in terrorism.

1910

1915

This is of direct concern for Europe – for our security and prosperity.

1920

So we need to show the same **unity of purpose towards Africa as we have shown for Ukraine.**

1925

1930

We need to focus on **cooperation with legitimate governments and regional organisations.**

1935

1940 And we need to develop a mutually beneficial partnership which focuses on common issues for Europe and Africa.

1945

This is why, together with High Representative Borrell, we will work on a **new strategic approach to take forward at the next EU-AU Summit.**

1950

1955

1960

Honourable Members,

1965

1970 History is on the move.

1975

Russia is waging a full-scale war against the founding principles of the UN

Charter.

1980

1985

This has raised immense concerns in countries from Central Asia to the Indo-Pacific.

1990

1995 They are worried that in a lawless world, they might face the same fate as Ukraine.

2000

We see a clear attempt by some to return to bloc thinking – trying to isolate and influence countries in between.

2005

2010 And it comes at a time when there is a deeper unease by many emerging economies about the way institutions and globalisation work for them.

2015

Those concerns are legitimate.

2020

2025

These emerging economies – with their people and natural assets – are essential allies in building a cleaner, safer and more prosperous world.

2030

Europe will always work with them to reform and improve the international system.

2035

2040

We want to lead efforts to make the rules-based order fairer and make distribution more equal.

2045

2050

This will also mean working with new and old partners to deepen our connections.

2055

And Europe's offer with **Global Gateway** is truly unique.

2060

2065

Global Gateway is more transparent, more sustainable, and more economically attractive.

2070

2075

Just last week I was in New Delhi to sign the most ambitious project of our generation.

2080

The **India-Middle East-Europe Economic Corridor**.

2085

2090

It will be the most direct connection to date between India, the Arabian Gulf and Europe: With a rail link, that will make trade between India and Europe 40% faster.

2100 With an electricity cable and a clean hydrogen pipeline – to foster clean energy trade between Asia, the Middle East and Europe.

2105

With a high-speed data cable, to link some of the most innovative digital ecosystems in the world, and create business opportunities all along the way.

2110

2115 These are state-of-the-art connections for the world of tomorrow.

2120

Faster, shorter, cleaner.

2125

**And Global Gateway is making the real difference.**

2130

2135

I have seen it in Latin America, South-East Asia and across Africa – from building a local hydrogen economy with Namibia and Kenya to a digital economy with the Philippines.

2140

2145

These are investments in our partners' economy.

2150

And they are investments in Europe's prosperity and security in a fast-changing world.

2155

2160

2165

Mesdames et Messieurs les députés,

2170

2175

Chaque jour, les conflits, le changement climatique et l'instabilité poussent les populations à chercher refuge ailleurs.

2180

J'ai toujours eu la ferme conviction que la migration doit être gérée.

2185

2190

Cela nécessite de la patience.

2195

Des efforts de longue durée avec nos partenaires.

2200

2205 Et surtout de l'unité au sein de notre Union.

2210

Ça c'est l'esprit du nouveau pacte sur la migration et l'asile.

2215

2220 Lorsque j'ai pris mes fonctions, il ne semblait pas y avoir de compromis possible en vue.

2225

Mais avec le pacte, nous avons trouvé un nouvel équilibre.

2230

2235 Entre la protection des frontières et la protection des personnes.

2240

Entre souveraineté et solidarité.

2245

Entre sécurité et humanité.

2250

2255

Nous avons écouté tous les États membres.

2260

Nous nous sommes penchés sur toutes les routes migratoires.

2265

2270

Et nous avons traduit l'esprit du pacte en solutions pratiques.

2275

Nous avons réagi rapidement et de manière unie à l'attaque hybride de la Biélorussie.

2280

2285

Nous avons travaillé en étroite collaboration avec nos partenaires des Balkans occidentaux – et réduit les flux irréguliers.

2295 Nous avons signé avec la Tunisie un partenariat qui apporte des avantages  
mutuels au-delà de la migration — de l'éducation et compétences  
professionnelles, à l'énergie et la sécurité.

2300

Et nous voulons maintenant travailler sur des accords similaires avec d'autres  
2305 pays.

2310

Nous avons renforcé la protection des frontières.

2315

Les agences européennes ont augmenté leur coopération avec les États  
2320 membres.

2325

Et je veux remercier en particulier la Bulgarie et la Roumanie d'avoir montré la  
voie, en mettant en avant les bonnes pratiques en matière d'asile et de retour.

2330

2335

**Elles l'ont prouvé: la Bulgarie et la Roumanie font partie de notre espace Schengen.**

2340

**Laissons-les enfin entrer, sans plus de retard !**

2345

2350

2355

Mesdames et messieurs,

2360

2365 Notre travail sur la migration se fonde sur la conviction que l'unité est à notre portée.

2370

Un accord sur le pacte n'a jamais été aussi proche.

2375

2380

Le Parlement et le Conseil ont une occasion historique de le faire aboutir.

2385

**Montrons que l'Europe peut gérer les migrations avec efficacité et compassion.**

2390

2395

**Finissons le travail !**

2400

2405

2410

Honourable Members,

2415

We know that migration requires constant work.

2420

2425 And nowhere is that more vital than in the fight against human smugglers.

2430

They attract desperate people with their lies.

2435

2440 And put them on deadly routes across the desert, or on boats that are unfit for  
the sea.

2445

The way these smugglers operate is continuously evolving.

2450

2455 But our legislation is over twenty years old and needs an urgent update.

2460

So we need new legislation and a new governance structure.

2465

2470 We need stronger law enforcement, prosecution and a more prominent role for our agencies – Europol, Eurojust and Frontex.

2475

And we need to work with our partners to tackle this global plague of human trafficking.

2480

This is why the Commission will organise an **International Conference on fighting people smuggling**.

2490

**It is time to put an end to this callous and criminal business!**

2495

2500

2505

## **UKRAINE**

2510

2515 Honorable Members,

2520

On the day when Russian tanks crossed the border into Ukraine, a young Ukrainian mother set off for Prague to bring her child to safety.

2525

2530

When the Czech border official stamped her passport, she started crying.

2535

Her son didn't understand. And he asked his mother why she was crying.

2540

2545 She answered: "Because we are home."

2550

"But this is not Ukraine," he argued.

2555

So she explained: "This is Europe."

2560

2565

On that day, that Ukrainian mother, felt that Europe was her home.

2570

Because “home is where we trust each other”.

2575

2580

And the people of Ukraine could trust their fellow Europeans.

2585

Her name was Victoria Amelina.

2590

2595 She was one of the great young writers of her generation and a tireless activist  
for justice.

2600

2605 Once her son was safe, Victoria returned to Ukraine to document Russia's war crimes.

2610

One year later she was killed by a Russian ballistic missile, while having dinner with colleagues.

2615

2620 The victim of a Russian war crime, one of countless attacks against innocent civilians.

2625

Amelina was with three friends that day – including Héctor Abad Faciolince, a fellow writer from Colombia.

2630

2635

He is part of a campaign called “Aguanta, Ucrania” – “Resist, Ukraine”, created to tell Latin Americans of Russia's war of aggression and attacks on civilians.

2640

2645 But Héctor could never imagine becoming the target himself.

2650

Afterwards, he said he didn't know why he lived and she died.

2655

2660 But now he is telling the world about Victoria. To save her memory and to end this war.

2665

And I am honoured that Héctor is here with us today.

2670

2675 And I want you to know that we will keep the memory of Victoria – and all other victims – alive.

Aguanta, Ucraina. Slava Ukraini!

2685

2690

2695

Honourable Members,

2700

We will be at Ukraine's side every step of the way.

2705

2710

For as long as it takes.

2715

Since the start of the war, four million Ukrainians have found refuge in our

2720 Union.

2725

And I want to say to them that they are as welcome now as they were in those  
fateful first weeks.

2730

2735 We have ensured that they have access to housing, healthcare, the job market  
and much more.

2740

2745

2750 Honourable Members,

2755

this was Europe answering the call of history.

2760

2765 **And so I am proud to announce that the Commission will propose to extend our temporary protection to Ukrainians in the EU.**

2770

Our support to Ukraine will endure.

2775

2780 We have provided 12 billion euros this year alone to help pay wages and pensions.

2785

To help keep hospitals, schools and other services running.

2790

2795 And through our ASAP proposal we are ramping up ammunition production to help match Ukraine's immediate needs.

2800

But we are also looking further ahead.

2805

2810

This is why we have proposed an additional 50 billion euros over four years for investment and reforms.

2815

This will help build Ukraine's future to rebuild a modern and prosperous country.

2820

2825

And that future is clear to see.

2830

This House has said it out loud: The future of Ukraine is in our Union.

2835

2840

The future of the Western Balkans is in our Union.

2845

The future of Moldova is in our Union.

2850

2855

And I know just how important the EU perspective is for so many people in Georgia.

2860

2865

2870

Honourable Members,

I started by speaking of Europe responding to the **call of history**.

2880

2885

And history is now calling us to work on completing our Union.

2890

In a world where some are trying to pick off countries one by one, we cannot afford to leave our fellow Europeans behind.

2895

2900

In a world where size and weight matters, it is clearly in Europe's strategic and security interests to complete our Union.

2905

But beyond the politics and geopolitics of it, we need to picture what is at stake.

2910

2915

We need to set out a vision for a successful enlargement.

2920

2925 A Union complete with over 500 million people living in a free, democratic and prosperous Union.

2930

A Union complete with young people who can live, study and work in freedom.

2935

2940 A Union complete with vibrant democracies in which judiciaries are independent, oppositions are respected, and journalists are protected.

2945

Because the rule of law and fundamental rights will always be the foundation of our Union – in current and in future Member States.

2950

2955

This is why the Commission has made the Rule of Law Reports a key priority.

2960

We now work closely with Member States to identify progress and concerns –  
2965 and make recommendations for the year ahead.

2970

This has ensured accountability in front of this House and national  
parliaments.

2975

2980 It has allowed for dialogue between Member States.

2985

And it is delivering results.

2990

2995 I believe that it can do the same for future Member States.

3000

This is why I am very happy to announce that we will open the Rule of Law Reports to those accession countries who get up to speed even faster.

3005

3010 This will place them on an equal footing with Member States.

3015

And support them in their reform efforts.

3020

3025 And it will help ensure that our future is a Union of freedom, rights and values for all.

3030

3035

3040 Honourable Members,

3045

This is in our shared interest.

3050

Think about the great enlargement of 20 years ago.

3055

3060

We called it the European Day of Welcomes.

3065

And it was a triumph of determination and hope over the burdens of the past.

3075

And in the 20 years since we have seen an economic success story which has improved the lives of millions.

3080

I want us to look forward to the next European Day of Welcomes and the next economic success stories.

3090

We know this is **not** an easy road.

3095

**Accession is merit-based – and the Commission will always defend this principle.**

3105

It takes **hard work and leadership.**

3110

3115 But there is already a lot of progress.

3120

We have seen the great strides Ukraine has already made since we granted them candidate status.

3125

3130 And we have seen the determination of other candidate countries to reform.

3135

3140

Honourable Members,

3145

3150

it is now time for us to match that determination.

3155

And that means thinking about how we get ready for a completed Union.

3160

3165

We need to move past old, binary debates about enlargement.

3170

This is not a question of deepening integration **or** widening the Union.

3175

3180 We can and we must do both.

3185

To give us the geopolitical weight and the capacity to act.

3190

3195 This is what our Union has always done.

3200

Each wave of enlargement came with a political deepening.

3205

We went from coal and steel towards full economic integration.

3210

3215

And after the fall of the Iron Curtain, we turned an economic project into a true Union of people and states.

3220

**I believe that the next enlargement must also be a catalyst for progress.**

3225

3230

We have started to build a Health Union at 27.

3235

And I believe we can finish it at 30+.

3240

3245

We have started to build a European Defence Union at 27.

3250

And I believe we can finish it at 30+.

3255

3260 We have proven that we can be a Geopolitical Union **and** showed we can move fast when we are united.

And I believe that Team Europe also works at 30+.

3270

3275

3280

Honourable Members,

3285

3290 I know this House believes the same.

3295

And the European Parliament has always been one of the main drivers of European integration.

3300

3305

It has been so throughout the decades.

3310

And it is once again today.

3315

3320 And I will always support this House – and all of those who want to reform the  
EU to make it work better for citizens.

3325

**And, yes, that means including through a European Convention and  
Treaty change if and where it is needed!**

3330

3335

But we cannot – **and we should not** – **wait for Treaty change** to move  
ahead with enlargement.

3340

3345 **A Union fit for enlargement can be achieved faster.**

3350

That means answering practical questions about how a Union of over 30 countries will work in practice.

3355

3360 And in particular about our capacity to act.

3365

The good news is that with every enlargement those who said it would make us less efficient were proven wrong.

3370

3375 Take the last few years.

3380

We agreed on NextGenerationEU at 27.

3385

3390 We agreed to buy vaccines at 27.

3395

We agreed on sanctions in record time – also at 27.

3400

3405 We agreed to purchase natural gas – not only at 27 but including Ukraine,  
Moldova and Serbia.

3410

So it can be done.

3415

3420 But we need to look closer at each policy and see how they would be affected by  
a larger Union.

3425

This is why the Commission will start working on a series of **pre-enlargement policy reviews** to see how each area may need to be adapted to a larger Union.

3430

3435

We will need to think about how our institutions would work – how the Parliament and the Commission would look.

3440

We need to discuss the future of our budget – in terms of **what** it finances, **how** it finances it, and how it is **financed**.

3450

And we need to understand how to ensure **credible security commitments** in a world where deterrence matters more than ever.

3455

These are questions we must address **today** if we want to be ready for tomorrow.

3465

And the Commission will play its part.

3470

3475

This is why we will **put forward our ideas to the Leaders' discussion under the Belgian Presidency.**

3480

We will be driven by the belief that completing our Union is the best investment in peace, security and prosperity for our Continent.

3485

3490

**So it is time for Europe to once again think big and write our own destiny!**

3495

3500

3505

## CONCLUSION

3510

3515 Honourable Members,

3520

Victoria Amelina believed that it is our collective duty to **write a new story for Europe.**

3525

3530 **This is where Europe stands today.**

3535

**At a time and place where history is written.**

3540

3545 **The future of our continent depends on the choices we make today.**

3550

**On the steps we take to complete our Union.**

3555

3560 The people of Europe want a Union that stands up for them in a time of great power competition.

3565

But also one that protects and stands close to them, as a partner and ally in their daily battles.

3570

3575 And we will listen to their voice.

3580

**If it matters to Europeans, it matters to Europe.**

3585

3590 Think again about the vision and imagination of the young generation I started  
my speech with.

3595

It is the moment to show them that we can build a continent where you can be  
who you are, love who you want, and aim as high as you want.

3600

3605

A continent **reconciled with nature** and **leading the way on new  
technologies.**

3610

A continent that is **united in freedom and peace.**

3615

3620

**Once again – this is Europe's moment to answer the call of history.**

3625

**Long live Europe.**
